

What's New in PRO Landscape Version 18

PRO Landscape® Companion for iPad – Free Companion App!!

- Create new photo imaging designs on the iPad.
- Transfer designs back and forth between iPad and desktop/laptop.
- Present your proposals to customers right on the iPad.
- Show movies from PRO Landscape (e.g., growth, 3D animations).

Image Editor

1000 New Images – PRO Landscape now includes over 10,000 of the industry's highest quality images. The majority of the new pictures are plants, covering all climate zones. **Expanded EZScape Toolbar** - More options on the EZScape toolbar make creating designs much faster. New tools include Grow, Create Instant Proposal, Database and Price Editor, Enable Lighting, Save to iPad and more.

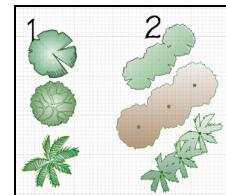

New PDF Proposal Booklet Creator. Select multiple pages PDF files (for example, the cover page, quote, Image Editor or Planner projects) and merge them into a single PDF document. Use that for presentations, to email to a client, or move to your iPad to show a prospect.

Lighting Enhancements – You can now add shadows to your lighting projects.

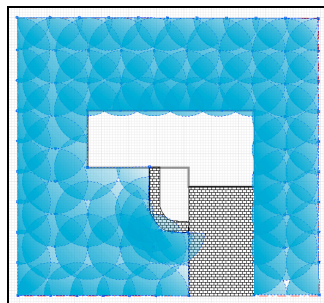

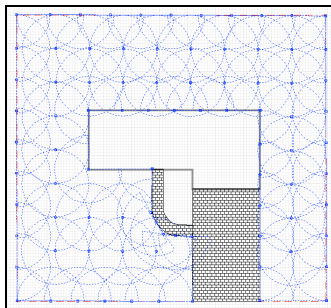

Planner

RealDWG 2012 - RealDWG compatibility has been upgraded to support the 2012 DWG and DXF CAD files, including AutoCAD 2012.

Fill Symbol and Fill Cluster– (1) Right click on a symbol and select Fill Symbol. Then choose the color/style you want. Makes for even more impressive looking color drawings. (2) You can also drag a color or pattern onto clustered symbols.

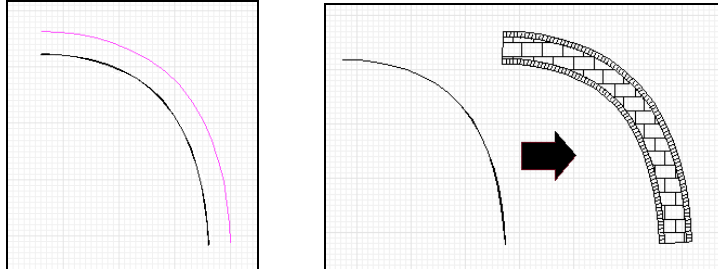

New Irrigation Layout Tools: (1) Automatic Sprinkler Head Placement - Define an area, select the head type, radius, and spray overlap percentage and Planner automatically diagrams your head layout. (2) The use the Irrigation Coverage Tool to apply a gradient fill showing which areas are over or under saturated. (3) Use the Create Sprinkler tool to create a single sprinkler head by defining, the head type, radius and exact spray angle. We've added new heads for Hunter, Rainbird & Toro or add your own.

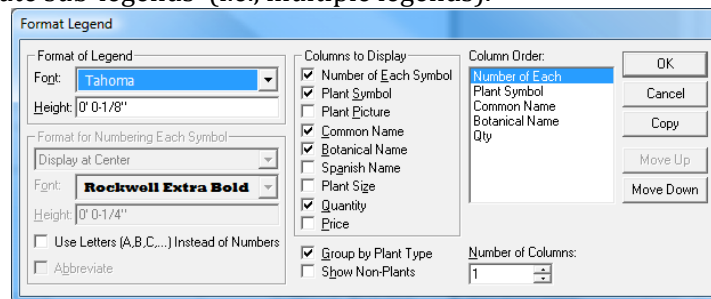

New Paver Tools –

What's New in PRO Landscape Version 18

1. **Paver Path** – Updated paver path tool makes drawing paver paths even easier.
2. **New Paver Offset Edge** – Draw one edge of a paver and adjust it until it is perfect. Then use the Paver Offset Edge tool to create a perfect offset the distance you specify.
3. **New Create Offset Edge and Paver** – Not only creates an offset edge, but creates a closed paver from your original paver edge. You can even have a soldier course applied automatically when the paver is created.

Enhanced Legend – You can now select the sort and column order for your legend. You can also now create sub-legends (i.e., multiple legends).

New Symbols – Adds hundreds of new symbols. Use the Change Symbol Graphic to assign a new symbol graphic for any object you choose.

New Paver Patterns – We've created new patterns for common paver layouts such as herringbone, pinwheel, running bond, etc.

Sample Collage Project – Create a single large Planner project that not only creates the Planner project, but Image Editor photos, and any reports from Proposal.

Weekend Gardener – Creates a layout “map” for use with the Weekend Gardener product. See terratemplates.com for more information on the Weekend Gardener.

Proposal

Enhanced QuickBooks Integration – Synchronize the customer data from PRO Landscape to a QuickBooks file. Eliminates duplicate entry, and changes made to one are automatically refreshed in the other.

Botanical Names in Database & Price Editor – When the user selects botanical mode the plant names now listed and sorted by botanical name.

New Choose Customer dialog – Tired of scrolling through a large list of customer names? Use the new Alphabetical Tabbed interface make it easier to choose a customer for a quote.

Update Proposal Button – Updates a proposal from changes made to a drawing. For example, if the original quote had 3 boxwoods, and now there are 4 on the drawing you would be given a choice of what to include on the quote.

Longer Description - Quote line items can have a longer description.
