

What's New in PRO Landscape Version 12

General

- NEW!** **Instant Customer Proposal Commands** – This new command allows the user to create a complete customer proposal from a single mouse click that includes a bid, material list, plant information, and cover page from right inside of Image Editor or Planner.
- NEW!** **Bilingual Plant Material Information** – PRO Landscape is the first design software to offer plant names in Spanish as well as English. Translated information can be used in quotes, material lists, plant information reports, plant legends, plant labeling, callouts, and more.
- NEW!** **Tutorials** – PRO Landscape has added a number of new tutorials covering key features and functionality of PRO Landscape making PRO Landscape the easiest professional design software to learn.
- NEW!** **Automated Registration** – Register PRO Landscape in just one easy step.

Image Editor

- NEW!** **Over 1000 New Images** – PRO Landscape now has over 5000 of the industry's best images. Includes new plants set up by climate zones, as well as new pavers and water features from major manufacturers.
- NEW!** **Image Editor Rendering Tool** – Instantly render a completed Image Editor design to one of eight rendered looks. New rendering options include; hand drawn, colored pencil, watercolor, charcoal, blueprint, embossed, edged, and impressionist.
- NEW!** **Quick Draw Tool** – New Quick Draw tool makes drawing multiple items of the same type lightning fast.
- NEW!** **Randomize Command** – New randomize command takes a single plant picture and instantly varies the size, shape, and color of the plant to create multiple images of the same plant that each look just a little different. This is perfect for a group of the same plant where you want to make each one look unique.
- NEW!** **Quick Draw and Randomize Tool** – This tool is a combination of the Quick Draw Tool and Randomize Command. Quickly draw and randomize a group of objects.
- NEW!** **Depth Shadowing Tool** – Provides increased realism for an Image Editor design by adding depth and softening edges to create more of a 3-D look.
- NEW!** **Holiday Lighting Features** – PRO Landscape has added numerous holiday objects including light displays and Linkables from Brite Ideas Decorating (www.briteidea.com).
- NEW!** **Dimension Linkable Tool** – This tool will calculate the number of Brite Ideas Linkables required for covering any given area.
- NEW!** **Snow Effect** – This new effect will create falling snow as a background for an Image Editor design.
- NEW!** **Holiday and Night Lighting Time Lapse Viewing Option** – PRO Landscape has added an additional time lapse viewing option. This new option gives the ability to create a movie that shows the Image Editor project go from light to dark to snow.
- NEW!** **Regional Coloring Option** – This new option lets the user alter plant material color for a specific region(s).

What's New in PRO Landscape Version 12

NEW! **Improved Growth Meter** – Negative growth can now go to ten years prior to maturity of the plant material for a more realistic view of a design from the day it is planted through maturity.

Planner

NEW! **Symbol Clustering Tool** – New symbol clustering tool allows the user to overlap a group of symbols and instantly create a new single symbol from the previous symbol grouping.

NEW! **Symbol Editor** – The new symbol editor allows for easy creation of new symbols as well as modification (size, shape, color) of existing symbols.

NEW! **Legend** – Legends can be created with numbers on the drawing that correspond to the legend. You can also put pictures of the plants in the legend.

NEW! **Gradient Fills** – A new gradient fill option lets you create symbols and patterns that have a more pleasant and defined look.

NEW! **Depth Shadowing for Planner** – This new option allows you to add depth shadowing and edge softening to your rendered CAD symbols.

NEW! **Updated AutoCAD Filters** – Import the latest AutoCAD files in DWG or DXF format.

NEW! **Callout Improvements** – This new timesaving improvement allows the callout name to be edited before the callout is actually placed.

NEW! **Inquire Linkable Tool** – This tool will display the segment length and quantity of Brite Ideas Linkables.

NEW! **Planting Diagrams** – New symbols that show a cross section of plantings.

Proposal

NEW! **Create Proposal Wizard** – The Create Proposal Wizard has been improved to make it more intuitive and user friendly.

NEW! **Improved Price Editing** – Numerous changes have been made to improve price editing including:

- The new Edit Pricing grid is larger and easier to read.
- Use of new colors and shades makes the Edit Pricing grid more aesthetically pleasing.
- The user can now change the plant size(s) right inside the Edit Pricing grid.

NEW! **Report Templates** – PRO Landscape Version 12 comes with over a dozen new report templates such as:

- Project profit report.
- Import/export customer lists. Allows for import and export of customer lists from other applications.
- New plant information report. This modification allows the user to create a plant information report with a larger picture and only a single plant per page.
- E-Mail address report. Create a mailing list for customer contact.

NEW! **Spanish Language Reports** – PRO Landscape reports are now available in Spanish. Create quotes, material lists, plant information, and other reports in Spanish.
