

# What's New in Version 25

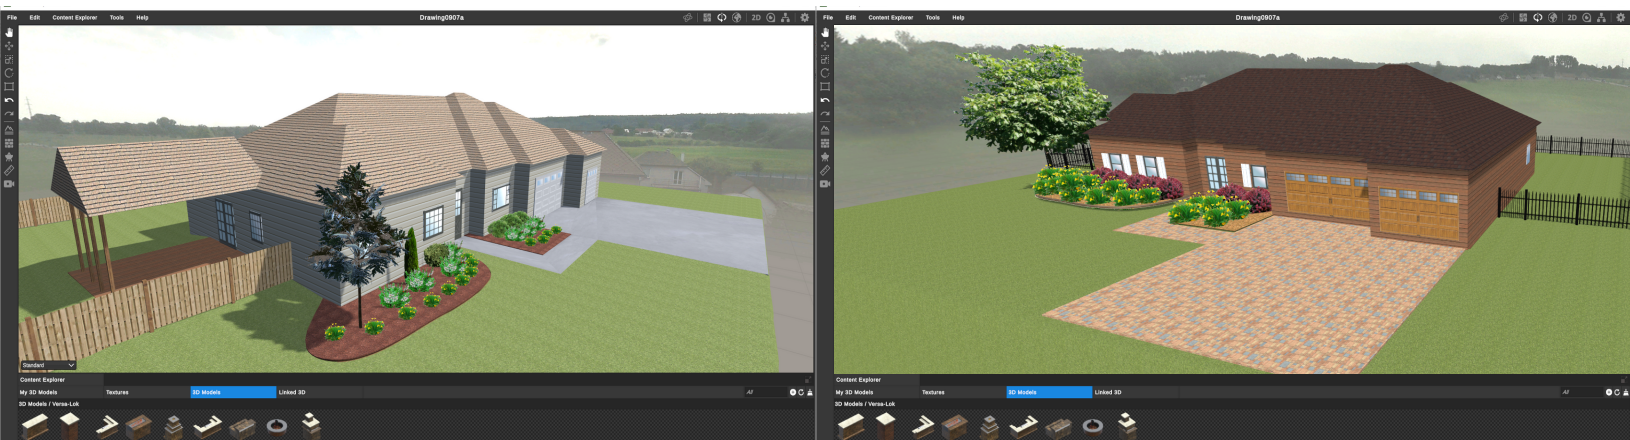

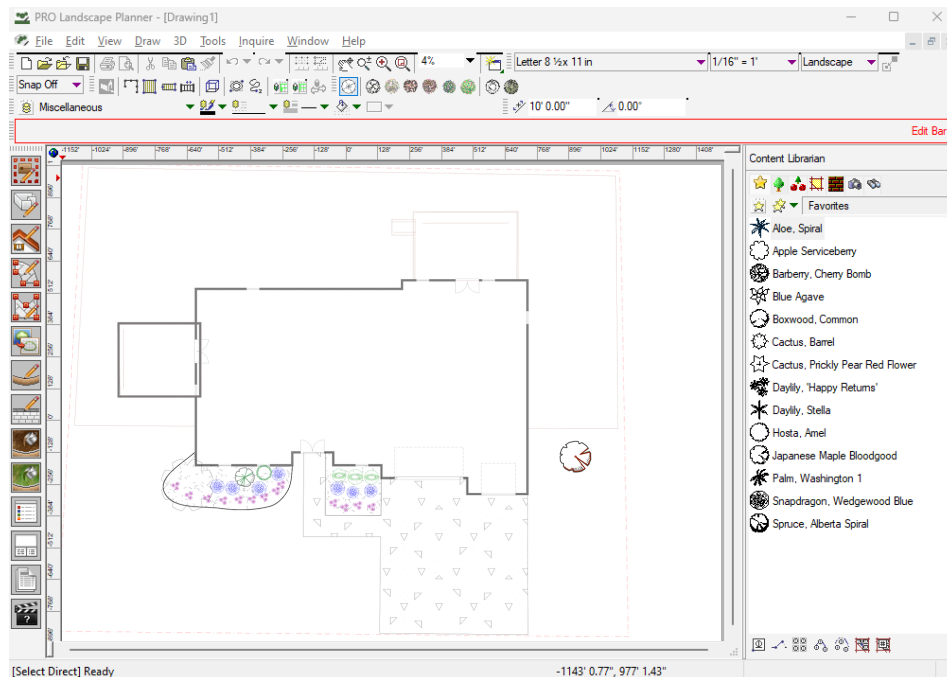

**PRO**  
**Landscape**  
DESIGN SOFTWARE

## 1,200 New Images

As always, PRO Landscape adds new images making the industry's largest library even larger. Version 25 adds over 1200 new images bringing the total to over 20,000 items for you to choose from for your Image Editor projects. That includes both plant images and updated paver options.

## New 3D Editor

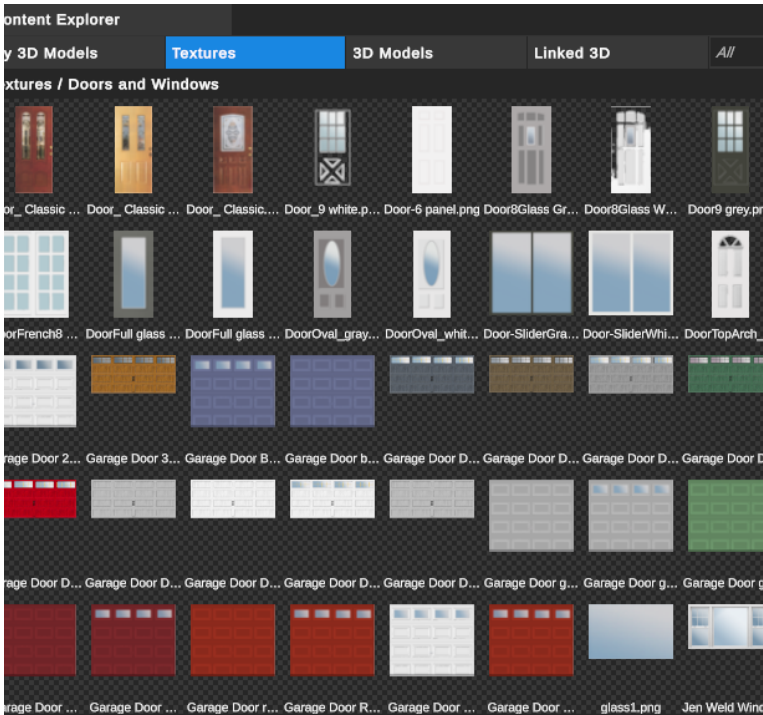

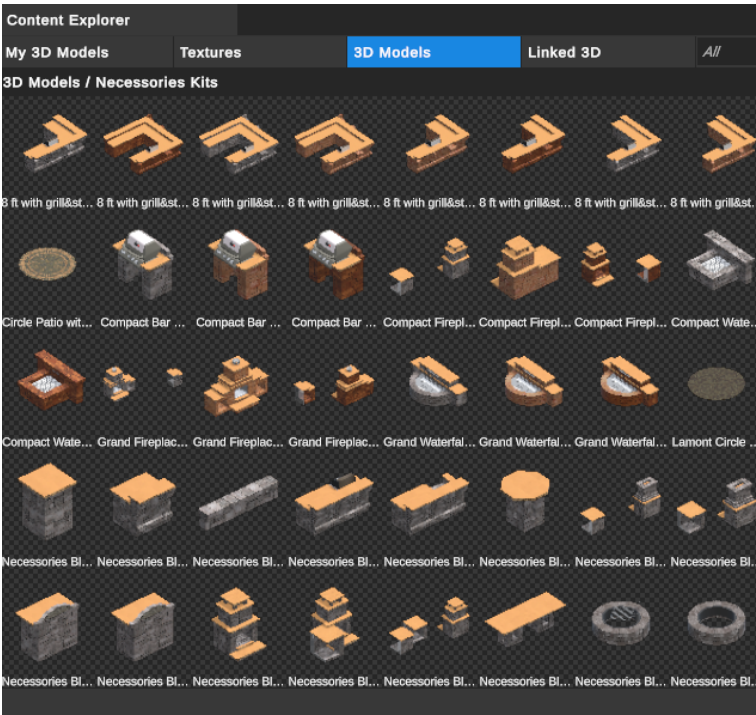

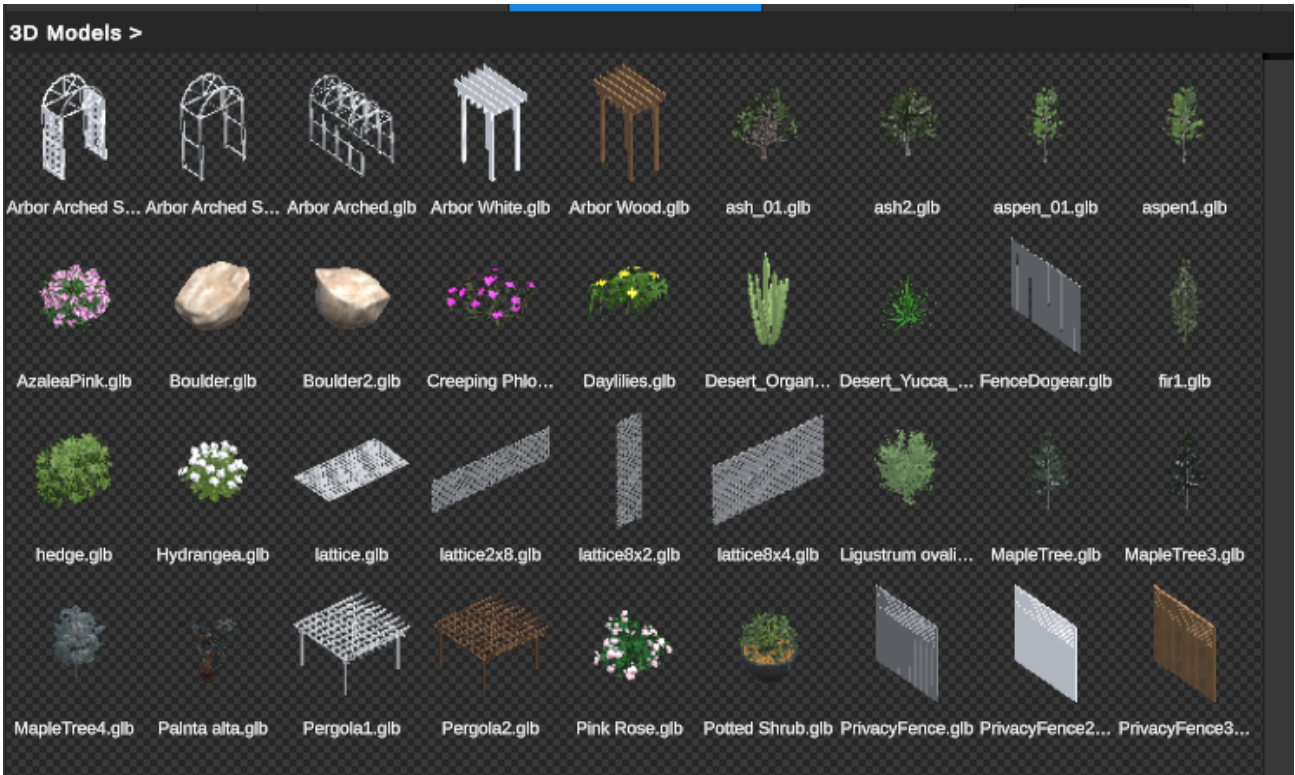

The PRO Landscape 3D Editor has been completely redesigned for Version 25. Users now have the tools to add depth and perspective to your Planner drawings. You can now define your 3D parameters in PRO Landscape Planner including length, width, and depth. Then simply render in 3D and add your favorite textures to the various design elements (roofing, siding, pavers, etc.). The new 3D Editor also contains tools for creating decking, fencing, arbors, pergolas and more.

# What's New in Version 25

## New 3D Editor, cont.

The new 3D Editor includes a library of 3D models that represent various items including doors, windows, outdoor kitchens and more. The 3D Editor also give you the ability to add your own 3D models at any time.

DESIGN SOFTWARE

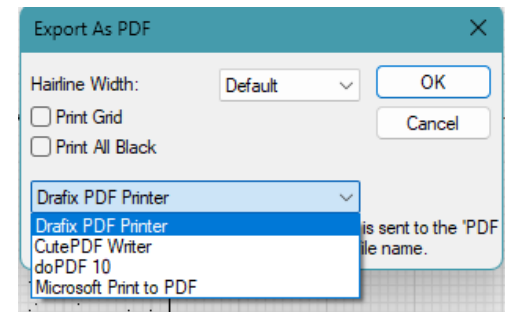

## Real DWG 2024

Version 25 includes the latest RealDWG for 2024 allowing PRO Landscape users to import and export drawings in the latest AutoCAD formats.

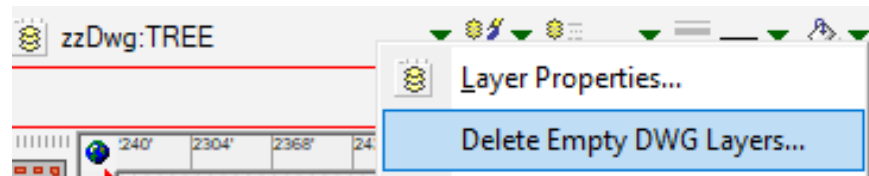

## Updated Export to PDF

The Export to PDF tool now includes options to create PDFs using alternate PDF Writers such as CutePDF and Microsoft Print to PDF. The new Drafix PDF Printer has also been added.

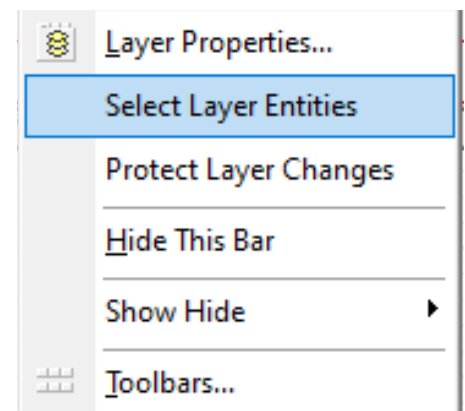

## DWG Layer Removal

For PRO Landscape users importing AutoCAD files, this new tool allows you to easily remove unnecessary empty layers from imported DWG files.

## Layer-Select All

Conveniently found in the Layer Properties Toolbar, Version 25 includes a new option for mass selection of all entities that reside within a single layer.

## Easy Unlinked Symbol Detection

Quickly identify symbols that are not currently linked to the PRO Landscape database. (For symbols that have been renamed, or imported from a different computer where the symbol was created.

## New Image Maker in Image Editor

The new Image Maker tool adds new options for cloning your background photos prior to import. This tool offers a new clone brush along with a handful of other useful cloning options.

## 64-Bit Technology

PRO Landscape Planner and the new Drafix PDF Printer are both 64-bit.
